## Education

**Bachelor of Science in Computer Graphics Technology**

May 2009

Purdue University, West Lafayette, IN

**Minor in Computer and Information Technology**

## Experience

**Co-Founder, Web Designer & Developer**

West Lafayette, IN

July 2010 - Present

**Alley9 Creative Studio**

- Created sketches, comps, mockups and prototypes of interfaces according to client specifications.
- Redesigned product websites using cross-browser compatible XHTML, CSS, JavaScript, and PHP.
- Improved professionalism, marketability, and visibility of client sites using modern technologies.

**Junior Programmer / Analyst**

Carmel, IN

May 2009 - Present

**J.D. Byrider Systems, Inc.**

- Created reports which pulled data from multiple servers using C#.Net, Multi-Dimensional Expressions, SQL, Analysis Services, & SQL Server. Manipulated and calculated results based on business rules.
- Created classes to simplify processing of MDX Queries and CSS theme-able enterprise wide reporting templates I created.
- Located and fixed bugs, optimized code, and increased usability of interfaces.
- Created and edited SQL stored procedures.
- Converted classic ASP pages to database-driven C#

**Web Designer / Programmer, Drupal Developer**

West Lafayette, IN

January 2010 - June 2010

**Purdue University Press**

- Designed a robust, data-driven, and feature-rich web presence with a custom Drupal implementation.
- Replaced outdated book and author management system and 100+ page flat HTML website.
- Integrated Google books services, a third party shopping cart, social networking, and page analytics.
- Researched, implemented, and customized modules to meet requirements and created a custom CSS theme for Drupal.

**Student Research Assistant**

West Lafayette, IN

February 2009 - May, 2009

**Envision Center for Data Perceptualization at Purdue**

- Researched potential solutions for data analysis and reporting on a High Performance Computing Cluster.
- Determined requirements, installation procedures, and feasibility of software for cluster utilization.

## Projects

**ISUSBCYA.com**

- Designed a custom Wordpress installation and tournament signup system with PayPal integration

**imPRINTS pdfMaker**

- Created a proof of concept using C#, LINQ, jQuery, XHTML, CSS and XML to allow for easy online customization of a template-based PDF 4-H handbook for online distribution.

**CCR Trucking Insurance**

- Designed a mockup for the landing page and content pages for CCR Trucking Insurances website using Photoshop

**Purdue University Hay Locator**

- Created the front-end design and programmed the backend user and listing management system from scratch using classic ASP, XML, AJAX, jQuery, and XHTML/CSS.
